## **Bowers School Star - Lucia Reyes**

***The Bowers School community is proud of all our scientists and inventors.***

Second grade inventor, Lucia Reyes, earned second place in the townwide Invention Convention. She created the Musical Rainbow to solve a problem helping her and her brother go to sleep more readily and, thus, make her parents happier!

We all wish her the best as she takes her invention to the state level at the Connecticut Invention Convention which will be held on May 2nd at the University of Connecticut.
